

BE READY.

Free

Free session

15 minutes of injury prevention for handball, no equipment.

Duration

15 min

Equipment

None

Frequency

Twice a week

Free session from 6M Lab: feel free to share it with your teammates. This program is for people in good health: if you feel pain, have an injury or are in doubt, stop and ask a health professional for advice.

Your free session

15 minutes, no equipment, to protect the areas that most often give way in handball: knees, ankles, hamstrings and shoulders. It is taken from the prevention work found in every session of the 6M Lab programs.

- **When?** Twice a week: at the end of your warm-up before practice, or on a day without handball.
- **How?** Do the steps from top to bottom. "2 × 10": 2 sets of 10 reps. The last column gives the rest between sets.
- **The animation?** Tap the eye next to an exercise to see it in motion.

Quality above all: a clean, controlled movement protects you, a sloppy one is useless. If it hurts, stop the exercise.

Prevention session · 15 min

1 GETTING GOING		3 min	
1	 Ankle mobility at the wall	10 per side	
2	 Walking hip opener	8 per side	
2 KNEES AND ANKLES		5 min	
3	 Single-leg balance	2 × 20 s per leg	15 s
4	 Small jump, stable landing	2 × 5	20 s
3 HAMSTRINGS AND HIPS		4 min	
5	 Glute bridge	2 × 10	15 s
6	 Nordic hamstring curl (short descent if you are a beginner)	2 × 3	60 s
4 TRUNK AND SHOULDERS		3 min	
7	 Side plank	2 × 20 s per side	15 s
8	 Y-T-W	6 of each letter	

What next?

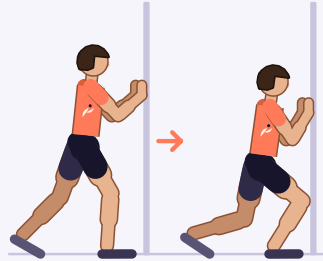

This session looks after your joints. To really progress (explosiveness, power, fitness), you need a program built week after week: that is what the 6M Lab programs offer, with every session written out in full and an animation for every exercise.

- **Pre-season:** 8 weeks to come back strong, before training restarts with your club.
- **In-season maintenance:** 2 sessions of 30 to 40 min per week to keep your level all season.

Find them on 6m-lab-seven.vercel.app.

The exercises

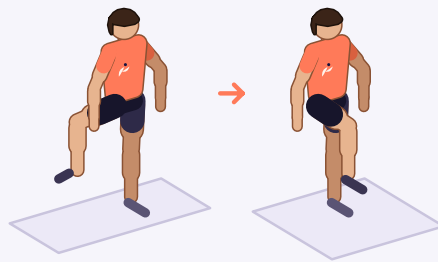

In the order of the numbers in the session.

1 Ankle mobility at the wall

Facing a wall, foot 10 cm away, drive your knee forward to touch the wall without lifting your heel.

Key points: Heel glued to the floor. Move your foot back if it is easy.

2 Walking hip opener

As you walk, lift your knee out to the side as if stepping over a fence, bring it round in front of you at the same height, and put your foot down one step further. Switch legs.

Key points: Upright trunk, big circle with the knee.

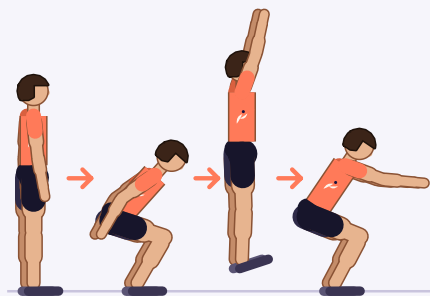

3

Single-leg balance

On one foot, knee slightly bent, arms relaxed: hold the position without moving. To progress: close your eyes, then stand on a cushion.

Key points: The knee stays over the foot, the pelvis level.

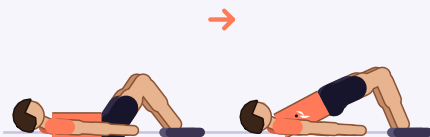

4

Small jump, stable landing

Small jump on the spot, land softly on both feet and hold the position for 2 seconds.

Key points: Land on the balls of your feet, knees bent and in line with your toes: they never cave inwards. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

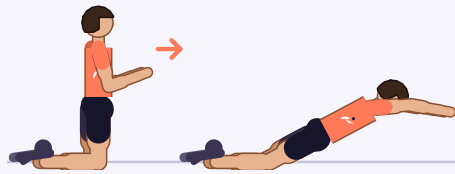

5

Glute bridge

On your back, knees bent, feet on the floor, lift your hips until shoulders, hips and knees are in line, then lower.

Key points: Squeeze your glutes at the top, do not arch your lower back. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

6

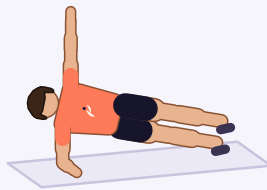

Nordic hamstring curl

Kneeling on a cushion, feet anchored under the sofa or held by another person, lean forward as slowly as possible, body straight. Catch yourself with your hands, then push back up with your hands.

Key points: Hips extended: the body stays straight from the knees to the head.

Easier: Shorter descent.

7

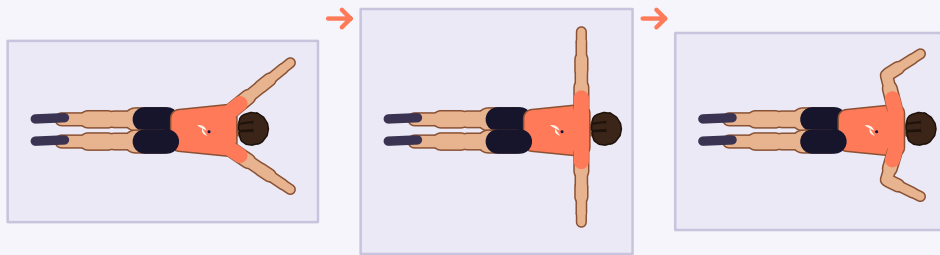

Side plank

On your side, on one forearm and the edge of your foot, body in line, hips high.

Key points: The hips do not drop.

Easier: Knees on the floor.

8

Y-T-W

Lying face down, forehead on a towel. Lift your arms off the floor to draw three letters with your body: Y (arms straight, diagonally above your head), T (arms out to the sides), then W (elbows bent, pulled in close to your ribs). Hold each letter for 2 seconds, squeezing your shoulder blades.

Key points: Thumbs towards the ceiling, no arching.
