In-season maintenance

Your sessions

Explosiveness

Program

In-season maintenance

Duration

12 weeks

Session

30 to 40 min

Place

Gym

For personal use only, do not share. This program is for people in good health: if you feel pain, have an injury or are in doubt, stop and ask a health professional for advice.

Your goal

You chose a single goal: every session gives it two blocks, and the focus changes over the weeks. What you worked on before stays in the sessions, with fewer sets, so you do not lose it.

Explosiveness

In handball, the decisive actions last less than 3 seconds: a first step to break into a gap, a change of direction to beat your opponent, a sprint back on defence.

- **Speed:** moving fast over a few metres.
- **Acceleration:** reaching your top speed as early as possible.
- **Changes of direction and agility:** braking, reorienting and setting off again without losing time.

The golden rules

- **Every rep flat out**, or nearly: quality matters more than quantity.
- **Recover fully** between reps: it is normal to wait.
- **Stop the set** if you slow down or your landings get heavy.
- Non-slip floor and shoes that hold your feet well.

Level 1: no more than **60 jumps** per session. Level 2: 80. Level 3: 100. Every landing counts as a jump.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

How to read your sessions

- Every session is written out in full, in order: do the steps from top to bottom.
- "2-4 × 8": 2 sets at level 1, 3 at level 2, 4 at level 3, of 8 reps. "2-3 × 8": 2 sets at levels 1 and 2, 3 at level 3.
- The number in front of each exercise refers to its illustrated sheet, at the end of this document.
- If you do not know your level, read the guide again, page "Choosing your level".

Your two sessions

The sessions are the same for all 12 weeks. **Weeks 4, 8 and 12 are lighter:** do one set less on each exercise. Weeks 1 to 3, 5 to 7 and 9 to 11: sessions as written, aiming for an effort of 7-8 out of 10.

Timing: session 1 at least 3 days before the match, session 2 no later than 2 days before. Never the day before a match.

Session 1 - the more demanding one, far from the match

1 WARM-UP

8 min

1	Light jog and running drills	2 min	
2	 Forward lunge with trunk rotation	5 per side	
3	 Glute bridge	1 × 10	
4	 Plank	1 × 20 s	
5	 Single-leg balance	20 s per leg	
6	 Small jump, stable landing	1 × 5	
7	Progressive accelerations (70 %, then 85 %)	2 runs	walk back

2 EXPLOSIVENESS · JUMPS

10-12 min

8	 Squat jump	2-3 × 4	75 s
9	 Broad jumps and triple jump (broad jumps)	2 × 3	90 s

3 EXPLOSIVENESS · SPEED AND CHANGES OF DIRECTION

10-12 min

10	 10 m starts	4-5 runs	75 s
11	20 m sprint	2-3 runs	2 min

4 CORE AND PREVENTION

5-8 min

12	 Nordic hamstring curl	2 × 3-5	60 s
13	 Copenhagen plank (knee version)	2 × 15 s per side	30 s
4	 Plank	1-2 × 30 s	30 s

5 COOL-DOWN

5 min

2 minutes of walking, then light stretches of 20 to 30 seconds, without forcing: hip flexors, quads, hamstrings, calves, chest and shoulders.

Session 2 · lighter

1 WARM-UP

8 min

1	Light jog and running drills	2 min	
2	Forward lunge with trunk rotation	5 per side	
3	Glute bridge	1 × 10	
4	Plank	1 × 20 s	
5	Single-leg balance	20 s per leg	
6	Small jump, stable landing	1 × 5	
7	Progressive accelerations (70 %, then 85 %)	2 runs	walk back

2 EXPLOSIVENESS · JUMPS

10-12 min

14	Pogos	2 × 10	45 s
15	Lateral bound with stable landing	2 × 4 per leg	45 s

3 EXPLOSIVENESS · SPEED AND CHANGES OF DIRECTION

10-12 min

16	5-10-5 shuttle	3 runs	90 s
17	Reactive starts	4-6 runs	60 s

4 CORE AND PREVENTION

5-8 min

18	Shoulder external rotation	2 × 12 per arm	30 s
19	Y-T-W	2 × 8	30 s
20	Balance with a ball	2 × 20 s per leg	20 s

5 COOL-DOWN

5 min

2 minutes of walking, then light stretches of 20 to 30 seconds, without forcing: hip flexors, quads, hamstrings, calves, chest and shoulders.

The exercises

In the order of the numbers used in your sessions.

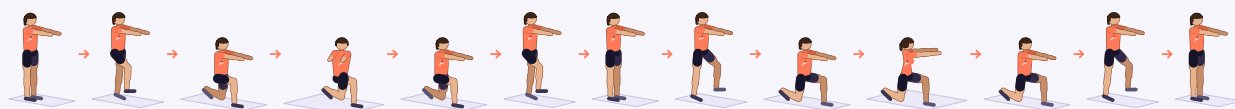

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

1 Light jog and running drills

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: light jog, then running drills (high knees, butt kicks). Otherwise: drills on the spot or in the gym's open space: 5 minutes of high knees, butt kicks and side shuffles.

Key points: Start slowly, then gradually pick up the pace.

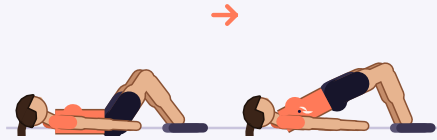

2

Forward lunge with trunk rotation

Take a big step forward, lower into a lunge, then turn your trunk towards the front leg. Come back and switch legs.

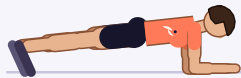

Key points: Front knee above the ankle, slow rotation.

3 Glute bridge

On your back, knees bent, feet on the floor, lift your hips until shoulders, hips and knees are in line, then lower.

Key points: Squeeze your glutes at the top, do not arch your lower back. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

4 Plank

On your forearms and toes, body in a straight line from head to heels.

Key points: Squeeze your glutes and abs, breathe normally.

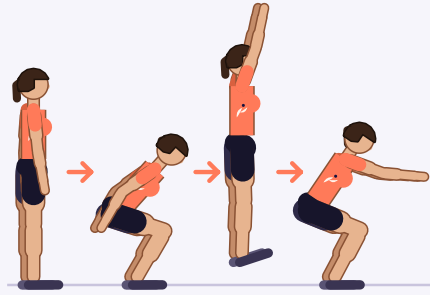

Easier: Knees on the floor.

5 Single-leg balance

On one foot, knee slightly bent, arms relaxed: hold the position without moving. To progress: close your eyes, then stand on a cushion.

Key points: The knee stays over the foot, the pelvis level.

6

Small jump, stable landing

Small jump on the spot, land softly on both feet and hold the position for 2 seconds.

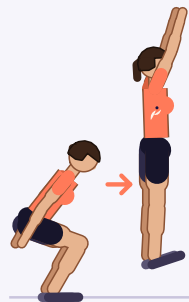

Key points: Land on the balls of your feet, knees bent and in line with your toes: they never cave inwards. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

7

Progressive accelerations

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: 3 accelerations of 5 seconds, faster each time. Otherwise: 3 accelerations of 10 seconds on an assault bike (air bike) or a rowing machine.

Key points: Relaxed, shoulders loose.

8

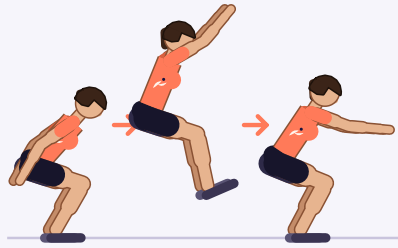

Squat jump

Lower into a half squat, pause for one second, then jump as high as you can. Stable landing.

Key points: Push hard into the floor, arms helping. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

Easier: Without the pause.

9 Broad jumps and triple jump

Standing long jump from both feet, stable landing. Triple jump: three jumps in a row, right foot, left foot, then land on both feet.

Key points: Arms swinging forward, controlled landing. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

10 10 m starts

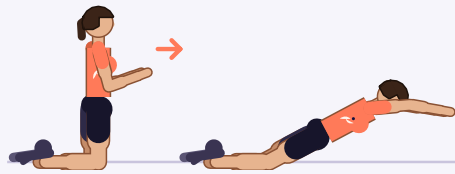

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: standing starts, 3 seconds flat out. Otherwise: 10 m starts in the gym's open space or outside.

Key points: Short, powerful first steps, arms driving back.

11 **20 m sprint**

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: 5-second sprint flat out. Otherwise: 20 m sprint in the gym's open space or outside, or else 6 seconds flat out on an assault bike.

Key points: Relaxed, shoulders loose.

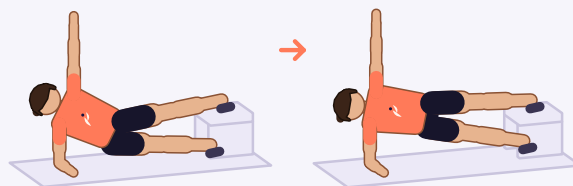

12 Nordic hamstring curl

Kneeling on a mat, feet anchored under a loaded bench, under wall bars or held by another person, lean forward as slowly as possible, body straight. Catch yourself with your hands, then push back up with your hands.

Key points: Hips extended: the body stays straight from the knees to the head.

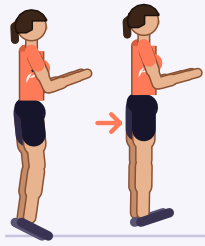

Easier: Shorter descent.

13 Copenhagen plank

On your side, on your forearm, top leg resting on a bench (at the knee, or at the foot to make it harder). Lift your hips and hold the position.

Key points: Body in line: the inside of the top thigh does the work.

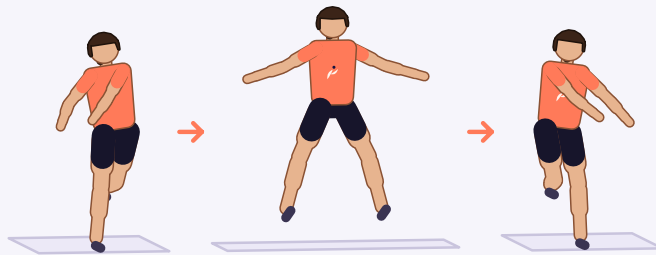

14 Pogos

Small quick jumps on the spot, legs almost straight: your ankles do the bouncing.

Key points: Shortest possible ground contact. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

Easier: Lower jumps, slower rhythm.

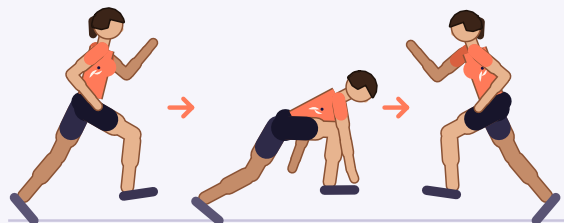

15 Lateral bound with stable landing

On one leg, jump sideways onto the other leg and hold for 2 seconds, like a skater.

Key points: The standing knee stays in line on landing. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

Easier: Shorter jump, the free foot touches the floor to help.

16 5-10-5 shuttle

Start in the middle: 5 m to the right (touch the line), 10 m to the left (touch), back to the middle.

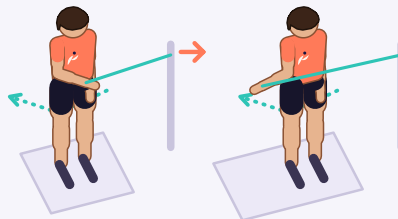

Key points: Get low before each change of direction, push off with the outside leg.

17 Reactive starts

Start on a partner's signal (clap, voice) or react to a dropped ball, from different positions: facing forward, facing backward, side shuffling.

Key points: React, don't guess.

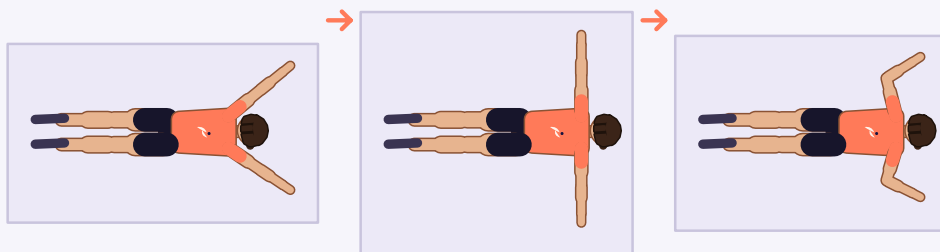

18 Shoulder external rotation

On a cable set at elbow height (or with a band): elbow tucked in and bent at 90°, move your forearm outwards, then come back slowly.

Key points: The elbow does not move, 2 seconds on the way back.

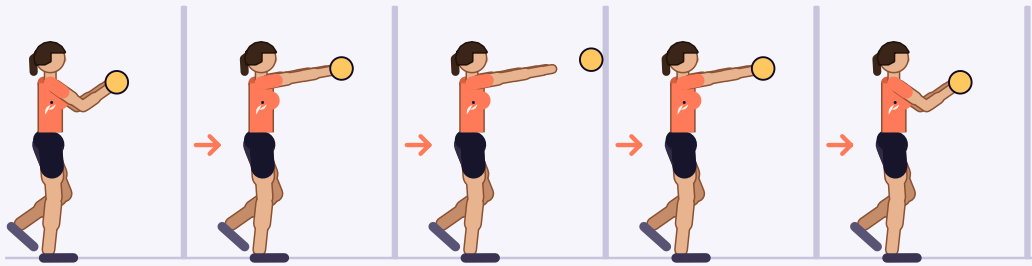

Easier: Without a band.

19 Y-T-W

Lying face down, forehead on a towel. Lift your arms off the floor to draw three letters with your body: Y (arms straight, diagonally above your head), T (arms out to the sides), then W (elbows bent, pulled in close to your ribs). Hold each letter for 2 seconds, squeezing your shoulder blades.

Key points: Thumbs towards the ceiling, no arching.

20

Balance with a ball

On one leg, on a bosu or a wobble board, throw a ball against a wall and catch it.

Key points: The standing knee stays in line.
