In-season maintenance

Your sessions

Muscle development + Fitness

Program

In-season maintenance

Duration

12 weeks

Session

30 to 40 min

Place

Gym

For personal use only, do not share. This program is for people in good health: if you feel pain, have an injury or are in doubt, stop and ask a health professional for advice.

Your goals

Muscle development

In handball, you take contacts in every attack and every defence. Stronger muscles protect your joints and make you harder to knock off balance.

- **Strength:** pushing, pulling and lifting heavier.
- **Mass gain:** building muscle size.
- **Core and stability:** transferring force from your legs to your arm and staying stable in contacts.

The golden rules

- **Technique first:** a load only goes up if the movement stays clean.
- **Progress a little every week:** one more rep, or a slightly heavier load.
- **Control the descent:** 2 to 3 seconds down, then back up with energy.
- Keep 2 to 3 reps in reserve: never train to failure.

Mass gain: training sends the signal, but muscles are built with food and sleep. Eat enough, with protein at every meal, and sleep 8 hours. For nutrition advice, see a registered dietitian.

Fitness

During a match, players cover about 4 km on average, alternating walking, running, sprints and contacts (Wagner et al., 2014). What makes the difference at the end of a game is the ability to repeat intense efforts and recover quickly between them.

- **Endurance:** the base that lets you recover between actions.
- **Repeated effort capacity:** stringing sprints together without losing speed.
- **Fat loss:** increasing energy expenditure while keeping your performance.
- **General fitness:** lasting a whole match and a whole season.

The golden rules

- **Progressive:** the volume goes up week after week, never all at once.
- **Stick to the paces:** easy = you can talk; steady = a few words; hard = impossible to talk.
- On repeated sprints, stop the set if your speed drops clearly.

Fat loss: training increases energy expenditure, but the result depends mostly on food and sleep. Avoid restrictive diets, which lower performance. For support, see a registered dietitian.

When three durations are given ("12-15-18 min"), they are for levels 1, 2 and 3.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

How to read your sessions

- Every session is written out in full, in order: do the steps from top to bottom.
- "2-4 × 8": 2 sets at level 1, 3 at level 2, 4 at level 3, of 8 reps. "2-3 × 8": 2 sets at levels 1 and 2, 3 at level 3.
- The number in front of each exercise refers to its illustrated sheet, at the end of this document.
- If you do not know your level, read the guide again, page "Choosing your level".

Your two sessions

The sessions are the same for all 12 weeks. **Weeks 4, 8 and 12 are lighter:** do one set less on each exercise. Weeks 1 to 3, 5 to 7 and 9 to 11: sessions as written, aiming for an effort of 7-8 out of 10.

Timing: session 1 at least 3 days before the match, session 2 no later than 2 days before. Never the day before a match.

Session 1 · the more demanding one, far from the match

1 WARM-UP

8 min

1	Light jog and running drills	2 min	
2	 Forward lunge with trunk rotation	5 per side	
3	 Glute bridge	1 × 10	
4	 Plank	1 × 20 s	
5	 Single-leg balance	20 s per leg	
6	 Small jump, stable landing	1 × 5	
7	Progressive accelerations (70 %, then 85 %)	2 runs	walk back

2 MUSCLE DEVELOPMENT

10-12 min

8	 Squat (or Bulgarian split squat)	2-3 × 5-6	2 min
9	 Row (or pull-ups)	2-3 × 6	90 s
10	 Hip thrust	2 × 8	75 s

3 FITNESS

10-12 min

11	15-15 intervals	1-2 × 8 min	3 min
----	-----------------	-------------	-------

4 CORE AND PREVENTION

5-8 min

12	 Nordic hamstring curl	2 × 3-5	60 s
13	 Copenhagen plank (knee version)	2 × 15 s per side	30 s
4	 Plank	1-2 × 30 s	30 s

5 COOL-DOWN

5 min

2 minutes of walking, then light stretches of 20 to 30 seconds, without forcing: hip flexors, quads, hamstrings, calves, chest and shoulders.

Session 2 · lighter

1 WARM-UP

8 min

1	Light jog and running drills	2 min	
2	 Forward lunge with trunk rotation	5 per side	
3	 Glute bridge	1 × 10	
4	 Plank	1 × 20 s	
5	 Single-leg balance	20 s per leg	
6	 Small jump, stable landing	1 × 5	
7	Progressive accelerations (70 %, then 85 %)	2 runs	walk back

2 MUSCLE DEVELOPMENT

10-12 min

14	 Dumbbell bench press	2 × 8-10	60 s
15	 Pallof press	2 × 10 per side	30 s
16	 Farmer's walk	2 × 20 m	60 s

3 FITNESS

10-12 min

17	Repeated sprints	1-2 sets	3 min
18	Easy run (recovery)	5-8 min	

4 CORE AND PREVENTION

5-8 min

19	 Shoulder external rotation	2 × 12 per arm	30 s
20	 Y-T-W	2 × 8	30 s
21	 Balance with a ball	2 × 20 s per leg	20 s

5 COOL-DOWN

5 min

2 minutes of walking, then light stretches of 20 to 30 seconds, without forcing: hip flexors, quads, hamstrings, calves, chest and shoulders.

The exercises

In the order of the numbers used in your sessions.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

1 Light jog and running drills

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: light jog, then running drills (high knees, butt kicks). Otherwise: drills on the spot or in the gym's open space: 5 minutes of high knees, butt kicks and side shuffles.

Key points: Start slowly, then gradually pick up the pace.

2 Forward lunge with trunk rotation

Take a big step forward, lower into a lunge, then turn your trunk towards the front leg. Come back and switch legs.

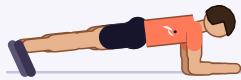

Key points: Front knee above the ankle, slow rotation.

3 Glute bridge

On your back, knees bent, feet on the floor, lift your hips until shoulders, hips and knees are in line, then lower.

Key points: Squeeze your glutes at the top, do not arch your lower back. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

4 Plank

On your forearms and toes, body in a straight line from head to heels.

Key points: Squeeze your glutes and abs, breathe normally.

Easier: Knees on the floor.

5 Single-leg balance

On one foot, knee slightly bent, arms relaxed: hold the position without moving. To progress: close your eyes, then stand on a cushion.

Key points: The knee stays over the foot, the pelvis level.

6

Small jump, stable landing

Small jump on the spot, land softly on both feet and hold the position for 2 seconds.

Key points: Land on the balls of your feet, knees bent and in line with your toes: they never cave inwards. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

7

Progressive accelerations

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: 3 accelerations of 5 seconds, faster each time. Otherwise: 3 accelerations of 10 seconds on an assault bike (air bike) or a rowing machine.

Key points: Relaxed, shoulders loose.

8

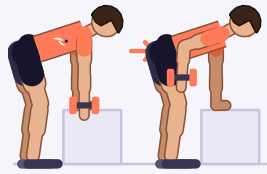

Squat

Feet shoulder-width apart, a dumbbell held against your chest (goblet squat), lower until your thighs are at least parallel to the floor, then stand up. Heavier: barbell on your upper back.

Key points: Straight back, heels on the floor, knees in line with your feet.

Easier: Sit down on a chair and stand up.

9 Row

Trunk bent forward, flat back, free hand on a bench: pull a dumbbell towards your hip. Other option: seated cable row.

Key points: Pull with your back, the shoulder blade moves towards the spine.

10 Hip thrust

Upper back against a bench, barbell (with a pad) or dumbbell on your hips, lift your hips until shoulders, hips and knees are in line.

Key points: Squeeze your glutes at the top for one second. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

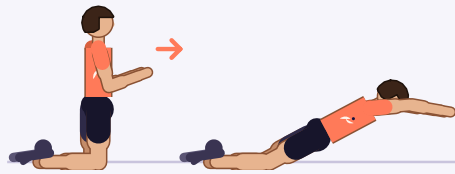

Easier: Glute bridge on the floor.

11 **15-15 intervals**

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: same work and recovery times. Otherwise: assault bike (air bike) or rowing machine, with the same times.

Key points: Same distance on every rep: pick a finish point.

Easier: 15 seconds fast, 30 seconds of recovery.

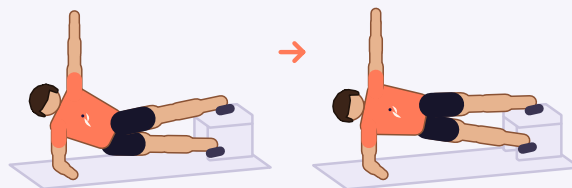

12 Nordic hamstring curl

Kneeling on a mat, feet anchored under a loaded bench, under wall bars or held by another person, lean forward as slowly as possible, body straight. Catch yourself with your hands, then push back up with your hands.

Key points: Hips extended: the body stays straight from the knees to the head.

Easier: Shorter descent.

13 Copenhagen plank

On your side, on your forearm, top leg resting on a bench (at the knee, or at the foot to make it harder). Lift your hips and hold the position.

Key points: Body in line: the inside of the top thigh does the work.

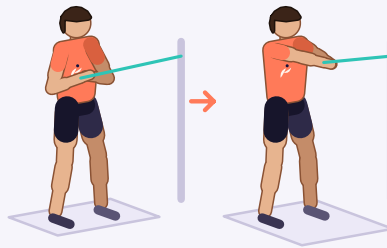

14 Dumbbell bench press

Lying on a bench, a dumbbell in each hand, lower the dumbbells to chest level, elbows at 45°, then push.

Key points: Elbows at 45° from your body, the hips do not sag.

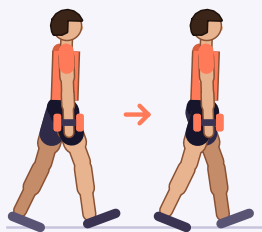

Easier: Push-ups, hands on a bench.

15 Pallof press

On a cable set at chest height (or with a band), side-on: press your arms out in front of you without letting your trunk rotate, hold for 2 seconds.

Key points: Resist the rotation: this is a core exercise.

16 Farmer's walk

Walk 20 m with a heavy dumbbell or kettlebell in each hand.

Key points: Shoulders down, upright trunk, steady steps.

17 Repeated sprints

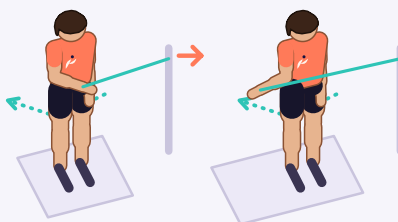

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: 6 sprints of 5 seconds, one start every 20 seconds. Otherwise: 6 sprints of 6 seconds on an assault bike, one start every 20 seconds.

Key points: Every sprint flat out.

18 Easy run

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: continuous running at a pace where you can talk. Otherwise: motorised treadmill, bike or cross-trainer, at the same intensity and for the same time.

Key points: If you cannot talk, slow down or alternate running and walking.

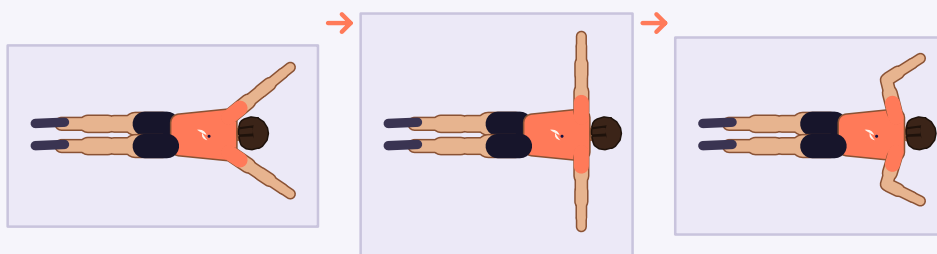

19 Shoulder external rotation

On a cable set at elbow height (or with a band): elbow tucked in and bent at 90°, move your forearm outwards, then come back slowly.

Key points: The elbow does not move, 2 seconds on the way back.

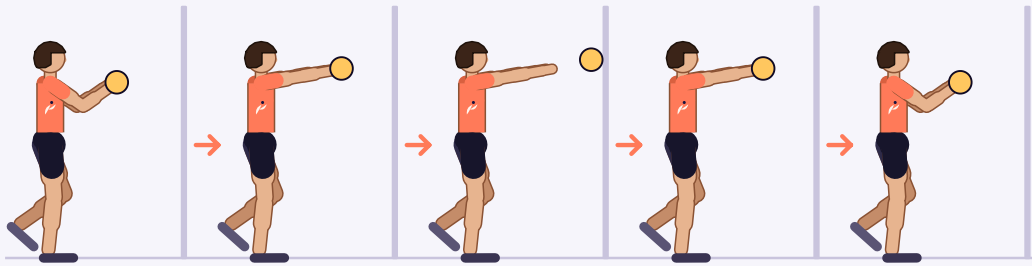

Easier: Without a band.

20 Y-T-W

Lying face down, forehead on a towel. Lift your arms off the floor to draw three letters with your body: Y (arms straight, diagonally above your head), T (arms out to the sides), then W (elbows bent, pulled in close to your ribs). Hold each letter for 2 seconds, squeezing your shoulder blades.

Key points: Thumbs towards the ceiling, no arching.

21 Balance with a ball

On one leg, on a bosu or a wobble board, throw a ball against a wall and catch it.

Key points: The standing knee stays in line.
