Duration

8 weeks

Session

45 to 60 min

Place

For personal use only, do not share. This program is for people in good health: if you feel pain, have an injury or are in doubt, stop and ask a health professional for advice.

Your goals

Explosiveness

In handball, the decisive actions last less than 3 seconds: a first step to break into a gap, a change of direction to beat your opponent, a sprint back on defence.

- **Speed:** moving fast over a few metres.
- **Acceleration:** reaching your top speed as early as possible.
- **Changes of direction and agility:** braking, reorienting and setting off again without losing time.

The golden rules

- **Every rep flat out**, or nearly: quality matters more than quantity.
- **Recover fully** between reps: it is normal to wait.
- **Stop the set** if you slow down or your landings get heavy.
- Non-slip floor and shoes that hold your feet well.

Level 1: no more than **60 jumps** per session. Level 2: 80. Level 3: 100. Every landing counts as a jump.

Prevention & health

In handball, the most common injuries affect the ankles, knees, shoulders and the muscles at the back and inside of the thigh. Studies show that many of them can be avoided with simple exercises done regularly: a targeted warm-up roughly halved knee and ankle injuries (Olsen et al., 2005), and a shoulder programme cut shoulder problems by 28 % (Andersson et al., 2017).

- **Injury prevention:** balance, jump landings, knee control.
- **Targeted strengthening:** knees, ankles, shoulders and hamstrings.
- **Mobility and flexibility:** hips, ankles and upper back.
- **Joint stability:** keeping your joints aligned in contacts.

The golden rules

- **Consistency before intensity:** repeating the sessions is what protects you.
- **The perfect movement:** a knee caving inwards on landing is exactly what we correct.
- These exercises should not hurt: discomfort is a signal to ease off.

These exercises prevent injuries, they do not treat them. If you are in pain right now, see a health professional before carrying on.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

How to read your sessions

- Every session is written out in full, in order: do the steps from top to bottom.
- "2-4 × 8": 2 sets at level 1, 3 at level 2, 4 at level 3, of 8 reps. "2-3 × 8": 2 sets at levels 1 and 2, 3 at level 3.
- The number in front of each exercise refers to its illustrated sheet, at the end of this document.
- If you do not know your level, read the guide again, page "Choosing your level".

Week 8 - Taper

Repeat sessions A, B and C from weeks 6-7 doing **half the sets**, at the same intensity. You will start the season with your club in top shape.

- **Explosiveness:** No drop jumps this week.
- **Prevention & health:** One set less on each exercise.

The exercises

In the order of the numbers used in your sessions.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

1 Light jog and running drills

Light jog, alternating side shuffles, high knees and butt kicks.

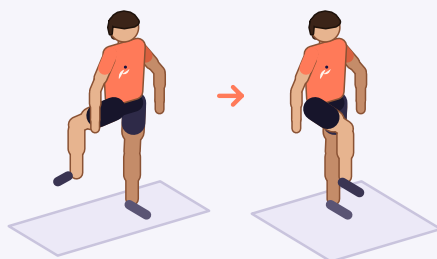

Key points: Start slowly, then gradually pick up the pace.

2 Forward lunge with trunk rotation

Take a big step forward, lower into a lunge, then turn your trunk towards the front leg. Come back and switch legs.

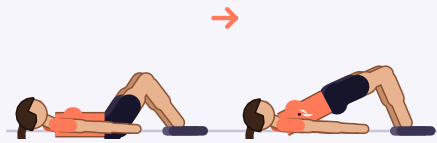

Key points: Front knee above the ankle, slow rotation.

3 Walking hip opener

As you walk, lift your knee out to the side as if stepping over a fence, bring it round in front of you at the same height, and put your foot down one step further. Switch legs.

Key points: Upright trunk, big circle with the knee.

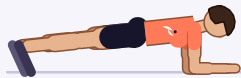

4

Glute bridge

On your back, knees bent, feet on the floor, lift your hips until shoulders, hips and knees are in line, then lower.

Key points: Squeeze your glutes at the top, do not arch your lower back. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

5

Plank

On your forearms and toes, body in a straight line from head to heels.

Key points: Squeeze your glutes and abs, breathe normally.

Easier: Knees on the floor.

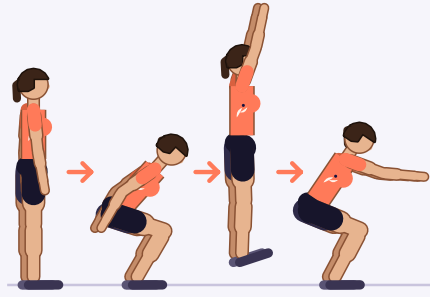

6

Single-leg balance

On one foot, knee slightly bent, arms relaxed: hold the position without moving. To progress: close your eyes, then stand on a cushion.

Key points: The knee stays over the foot, the pelvis level.

7

Small jump, stable landing

Small jump on the spot, land softly on both feet and hold the position for 2 seconds.

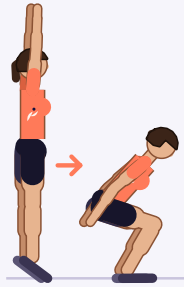

Key points: Land on the balls of your feet, knees bent and in line with your toes: they never cave inwards. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

8

Progressive accelerations

Run 15 m, building up speed: 60 %, then 80 %, then 90 % of your top speed. Walk back.

Key points: Relaxed, shoulders loose.

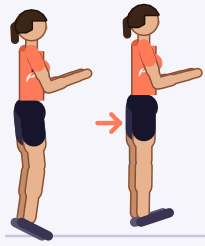

9

Stable landing (snap-down)

Standing, arms up, drive yourself down by pulling your arms back and land in a half squat on both feet. Hold for 2 seconds.

Key points: Knees in line with your toes, chest over your knees, silent landing.

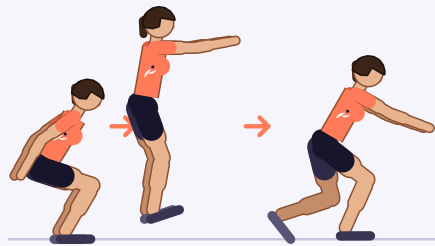

10 Pogos

Small quick jumps on the spot, legs almost straight: your ankles do the bouncing.

Key points: Shortest possible ground contact. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

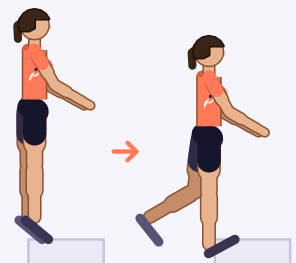

Easier: Lower jumps, slower rhythm.

11 Single-leg landing

Small hop forwards (then sideways, then diagonally), land on one leg, hold for 3 seconds.

Key points: Land softly, knee in line with your foot. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

12 Calves: slow lowering

On the edge of a stair step, rise onto the balls of both feet, then lower over 3 seconds on one foot.

Key points: The heel goes below the level of the step.

13 Side plank

On your side, on one forearm and the edge of your foot, body in line, hips high.

Key points: The hips do not drop.

Easier: Knees on the floor.

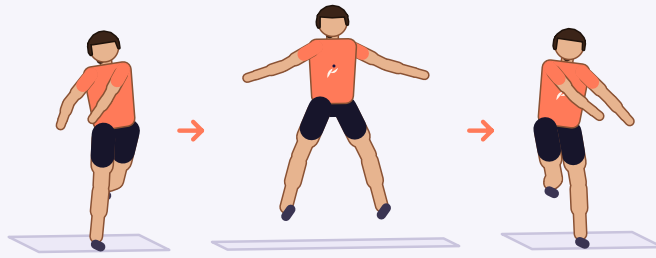

14 Nordic hamstring curl

Kneeling on a cushion, feet anchored under the sofa or held by another person, lean forward as slowly as possible, body straight. Catch yourself with your hands, then push back up with your hands.

Key points: Hips extended: the body stays straight from the knees to the head.

Easier: Shorter descent.

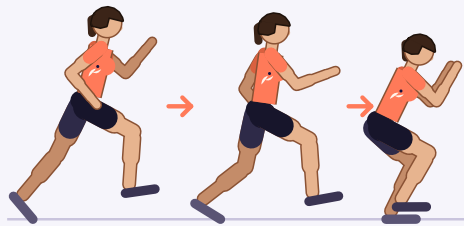

15 Lateral bound with stable landing

On one leg, jump sideways onto the other leg and hold for 2 seconds, like a skater.

Key points: The standing knee stays in line on landing. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

Easier: Shorter jump, the free foot touches the floor to help.

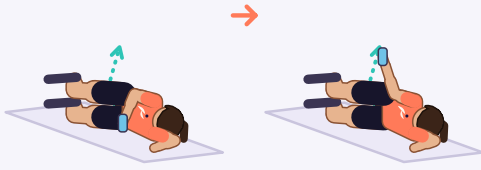

16 Braking

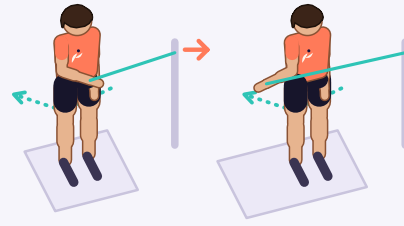

Sprint 10 m, then come to a complete stop in 3 steps, in a low defensive stance.

Key points: Low centre of gravity, wide base, knees in line. Never brake with straight legs: bend your knees to absorb, otherwise the impact goes into your joints.

At home

With a band

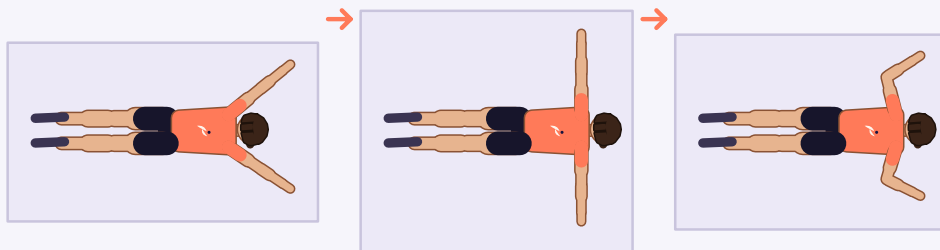

17 Shoulder external rotation

Lying on your side, top elbow tucked against your waist and bent at 90°, a water bottle in your hand, forearm resting in front of your belly: lift your forearm towards the ceiling by pivoting around the elbow (the hand moves away from your belly), then lower slowly.

With a band: Standing, band anchored to the side: elbow tucked in, move your forearm outwards.

Key points: The elbow does not move, 2 seconds on the way back.

Easier: Without a band.

18 Y-T-W

Lying face down, forehead on a towel. Lift your arms off the floor to draw three letters with your body: Y (arms straight, diagonally above your head), T (arms out to the sides), then W (elbows bent, pulled in close to your ribs). Hold each letter for 2 seconds, squeezing your shoulder blades.

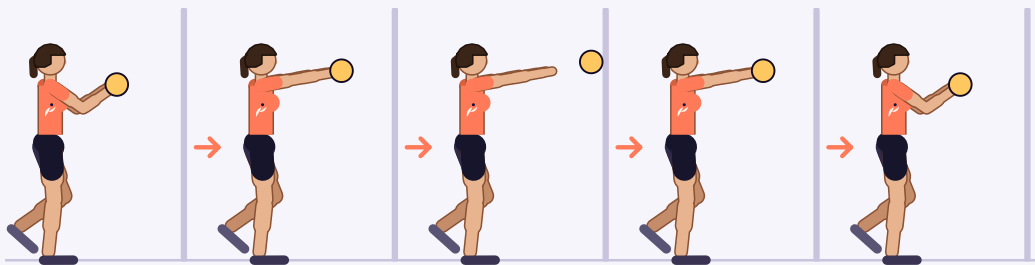

Key points: Thumbs towards the ceiling, no arching.

19 Dead bug

On your back, arms straight up towards the ceiling, knees bent at 90°. Extend one arm and the opposite leg without touching the floor, then switch sides.

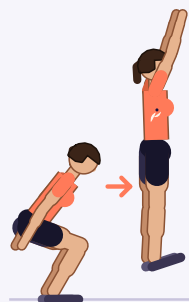

Key points: Your lower back stays pressed to the floor.

20 Balance with a ball

On one leg, on a folded cushion, throw a ball against a wall and catch it.

Key points: The standing knee stays in line.

21 Squat jump

Lower into a half squat, pause for one second, then jump as high as you can. Stable landing.

Key points: Push hard into the floor, arms helping. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

Easier: Without the pause.

22 10 m starts

Split-stance start, trunk leaning forward. Sprint flat out for 10 m.

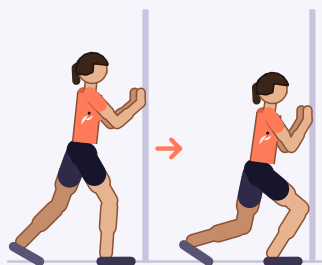

Key points: Short, powerful first steps, arms driving back.

23 90/90 hip mobility

Seated on the floor, hands on the floor behind you, feet flat and wider than your hips, knees up. Let both knees drop to the same side into the 90/90 position: front leg bent at 90° in front of you, back leg bent at 90° out to the side. Bring the knees back up through the middle and over to the other side, like windscreen wipers.

Key points: Upright trunk, slow movement. Only go as far as your hips allow, pain-free.

24 Ankle mobility at the wall

Facing a wall, foot 10 cm away, drive your knee forward to touch the wall without lifting your heel.

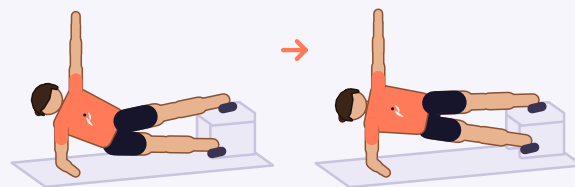

Key points: Heel glued to the floor. Move your foot back if it is easy.

25 Single-leg glute bridge

Like the glute bridge, with one leg straight in the air.

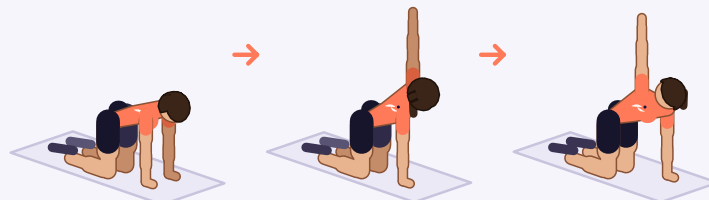

Key points: The pelvis stays level. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

26 Copenhagen plank

On your side, on your forearm, top leg resting on the sofa or a chair (at the knee, or at the foot to make it harder). Lift your hips and hold the position.

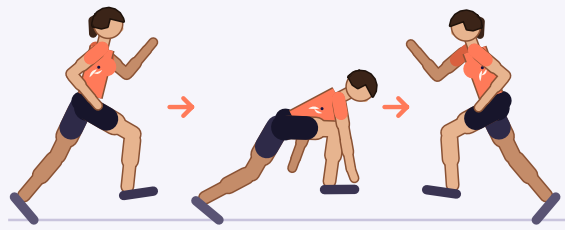

Key points: Body in line: the inside of the top thigh does the work.

27 Upper back rotation

On all fours, hands under your shoulders. Rotate your upper back as you reach one arm towards the ceiling, following your hand with your eyes, then bring it back down and do the same with the other arm.

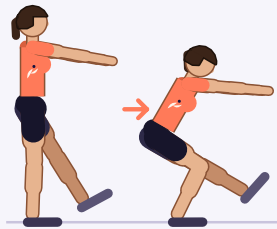

Key points: The pelvis does not move.

28 5-10-5 shuttle

Start in the middle: 5 m to the right (touch the line), 10 m to the left (touch), back to the middle.

Key points: Get low before each change of direction, push off with the outside leg.

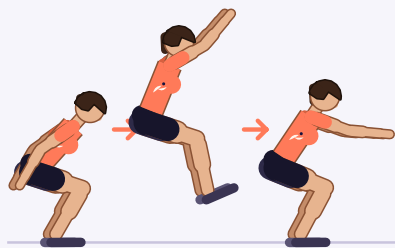

29 Single-leg squat

On one leg, slowly lower into a quarter squat then stand back up.

Key points: The knee does not cave inwards.

Easier: With a hand on a wall.

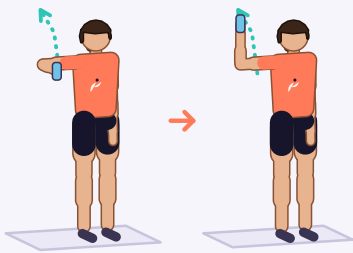

30 Broad jumps and triple jump

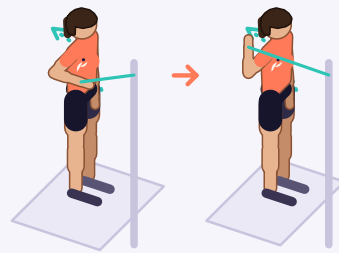

Standing long jump from both feet, stable landing. Triple jump: three jumps in a row, right foot, left foot, then land on both feet.

Key points: Arms swinging forward, controlled landing. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

At home

With a band

31 External rotation, arm raised

Standing tall, arm out to the side at shoulder height, elbow at 90°, a water bottle in your hand, forearm pointing forward: rotate your forearm upwards (the hand rises towards the ceiling, the elbow does not move), then lower slowly.

With a band: Band anchored in front of you: upper arm horizontal, elbow at 90°, rotate your forearm upwards.

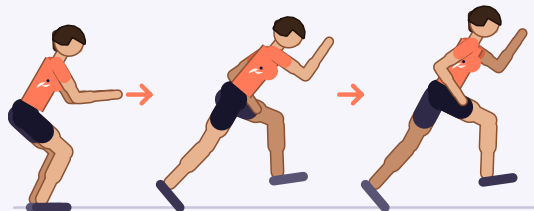

Key points: Slow and controlled, pain-free.

32 Scapular push-ups

In a straight-arm plank, squeeze then spread your shoulder blades without bending your elbows.

Key points: Small movement: only the shoulder blades move.

33 Reactive starts

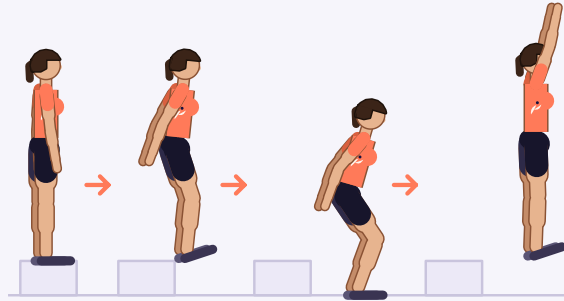

Start on a partner's signal (clap, voice) or react to a dropped ball, from different positions: facing forward, facing backward, side shuffling.

Key points: React, don't guess.

34 20 m sprint

Sprint at top speed over 20 m.

Key points: Relaxed, shoulders loose.

35 Drop jump (level 3)

Step off a stair step (20-30 cm) and, as soon as your feet touch the floor, bounce up as high as you can.

Key points: Very short contact. Only if your landings are perfect. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.
