In-season maintenance

Your sessions

Power + Fitness

Program

In-season maintenance

Duration

12 weeks

Session

30 to 40 min

Place

Gym

For personal use only, do not share. This program is for people in good health: if you feel pain, have an injury or are in doubt, stop and ask a health professional for advice.

Your goals

Power

Power is force multiplied by speed. A jump shot, a duel at pivot or a first step all require producing a lot of force in a fraction of a second.

- **Push heavy:** increase your maximum strength with heavy loads and few reps.
- **Move fast:** turn that strength into fast movements (throws, jumps, pushes).
- **Link the two:** pair a heavy exercise with a similar fast movement (contrast method).

The golden rules

- **Few reps, lots of rest:** 3 to 5 reps, 2 to 3 minutes of recovery.
- **Every rep at maximum speed,** even with a heavy load: the intent is what counts.
- Heavy loads only if your technique is perfect.

For heavy loads, get another person to spot you or use a power rack with the safety bars set.

Fitness

During a match, players cover about 4 km on average, alternating walking, running, sprints and contacts (Wagner et al., 2014). What makes the difference at the end of a game is the ability to repeat intense efforts and recover quickly between them.

- **Endurance:** the base that lets you recover between actions.
- **Repeated effort capacity:** stringing sprints together without losing speed.
- **Fat loss:** increasing energy expenditure while keeping your performance.
- **General fitness:** lasting a whole match and a whole season.

The golden rules

- **Progressive:** the volume goes up week after week, never all at once.
- **Stick to the paces:** easy = you can talk; steady = a few words; hard = impossible to talk.
- On repeated sprints, stop the set if your speed drops clearly.

Fat loss: training increases energy expenditure, but the result depends mostly on food and sleep. Avoid restrictive diets, which lower performance. For support, see a registered dietitian.

When three durations are given ("12-15-18 min"), they are for levels 1, 2 and 3.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

How to read your sessions

- Every session is written out in full, in order: do the steps from top to bottom.
- "2-4 × 8": 2 sets at level 1, 3 at level 2, 4 at level 3, of 8 reps. "2-3 × 8": 2 sets at levels 1 and 2, 3 at level 3.
- The number in front of each exercise refers to its illustrated sheet, at the end of this document.
- If you do not know your level, read the guide again, page "Choosing your level".

Your two sessions

The sessions are the same for all 12 weeks. **Weeks 4, 8 and 12 are lighter:** do one set less on each exercise. Weeks 1 to 3, 5 to 7 and 9 to 11: sessions as written, aiming for an effort of 7-8 out of 10.

Timing: session 1 at least 3 days before the match, session 2 no later than 2 days before. Never the day before a match.

Session 1 · the more demanding one, far from the match

1 WARM-UP

8 min

1		Light jog and running drills	2 min	
2		Forward lunge with trunk rotation	5 per side	
3		Glute bridge	1 × 10	
4		Plank	1 × 20 s	
5		Single-leg balance	20 s per leg	
6		Small jump, stable landing	1 × 5	
7		Progressive accelerations (70 %, then 85 %)	2 runs	walk back

2 POWER

10-12 min

8		Heavy squat (or heavy hip thrust)	2-3 × 3	3 min
9		Rotational throw	2 × 4 per side	60 s

3 FITNESS

10-12 min

10		15-15 intervals	1-2 × 8 min	3 min
----	--	-----------------	-------------	-------

4 CORE AND PREVENTION

5-8 min

11		Nordic hamstring curl	2 × 3-5	60 s
12		Copenhagen plank (knee version)	2 × 15 s per side	30 s
4		Plank	1-2 × 30 s	30 s

5 COOL-DOWN

5 min

2 minutes of walking, then light stretches of 20 to 30 seconds, without forcing: hip flexors, quads, hamstrings, calves, chest and shoulders.

Session 2 · lighter

1 WARM-UP

8 min

1	Light jog and running drills	2 min	
2	 Forward lunge with trunk rotation	5 per side	
3	 Glute bridge	1 × 10	
4	 Plank	1 × 20 s	
5	 Single-leg balance	20 s per leg	
6	 Small jump, stable landing	1 × 5	
7	Progressive accelerations (70 %, then 85 %)	2 runs	walk back

2 POWER

10-12 min

13	 Box jump	2-3 × 3	90 s
14	 Two-handed ball throw	2-3 × 4	60 s

3 FITNESS

10-12 min

15	Repeated sprints	1-2 sets	3 min
16	Easy run (recovery)	5-8 min	

4 CORE AND PREVENTION

5-8 min

17	 Shoulder external rotation	2 × 12 per arm	30 s
18	 Y-T-W	2 × 8	30 s
19	 Balance with a ball	2 × 20 s per leg	20 s

5 COOL-DOWN

5 min

2 minutes of walking, then light stretches of 20 to 30 seconds, without forcing: hip flexors, quads, hamstrings, calves, chest and shoulders.

The exercises

In the order of the numbers used in your sessions.

Important: watch each exercise's animation before doing it. Tap the eye next to its name. The animation shows what the text cannot: the exact position, the direction of the movement, the rhythm and the footwork. Do not just read the program, especially for an exercise you do not know: this is what makes every session effective and safe.

1 Light jog and running drills

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: light jog, then running drills (high knees, butt kicks). Otherwise: drills on the spot or in the gym's open space: 5 minutes of high knees, butt kicks and side shuffles.

Key points: Start slowly, then gradually pick up the pace.

2

Forward lunge with trunk rotation

Arms straight out in front of you, take a big step forward and lower into a lunge, then turn your trunk and arms towards the front leg. Come back and switch legs.

Key points: Front knee above the ankle, slow rotation.

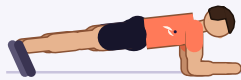

3

Glute bridge

On your back, knees bent, feet on the floor, lift your hips until shoulders, hips and knees are in line, then lower.

Key points: Squeeze your glutes at the top, do not arch your lower back. Also contract your pelvic floor (as if holding in urine): it protects against leaks, especially for women and older people.

4

Plank

On your forearms and toes, body in a straight line from head to heels.

Key points: Squeeze your glutes and abs, breathe normally.

Easier: Knees on the floor.

5

Single-leg balance

On one foot, knee slightly bent, the other foot off the floor behind you, arms relaxed: hold the position without moving. To progress: close your eyes, then stand on a cushion.

Key points: The knee stays over the foot, the pelvis level.

6

Small jump, stable landing

Small jump on the spot, land softly on both feet and hold the position for 2 seconds.

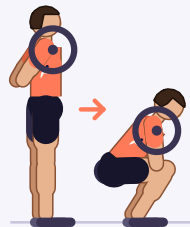

Key points: Land on the balls of your feet, knees bent and in line with your toes: they never cave inwards. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

7

Progressive accelerations

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: 3 accelerations of 5 seconds, faster each time. Otherwise: 3 accelerations of 10 seconds on an assault bike (air bike) or a rowing machine.

Key points: Relaxed, shoulders loose.

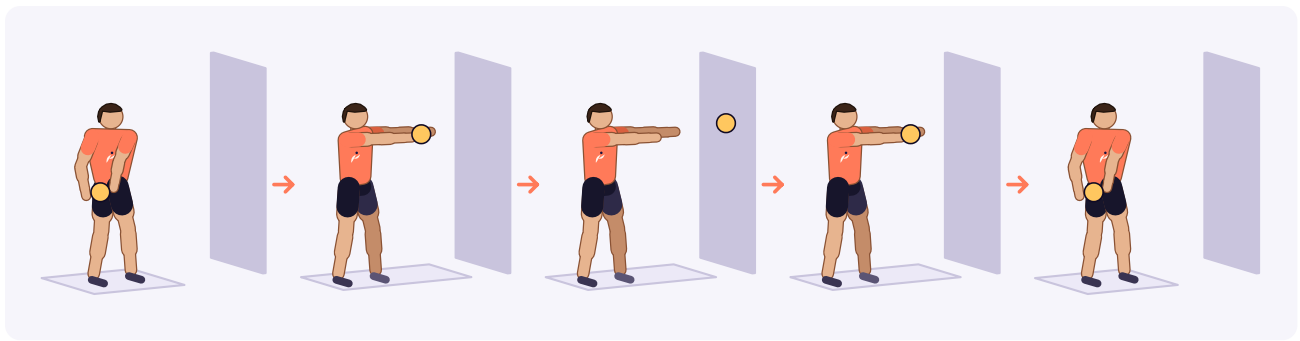

8

Heavy squat

Squat with a barbell on your upper back (or heavy dumbbells), 3 to 5 reps.

Key points: Controlled descent, stand up as fast as possible.

9 Rotational throw

Side-on to the wall, 2 to 4 kg medicine ball held at your hip, pivot and throw sideways, like a shot.

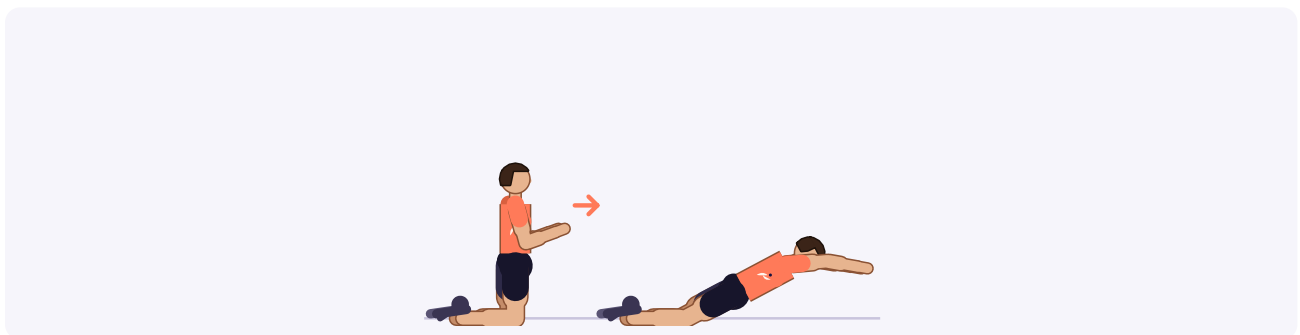

Key points: The movement starts from the hips, not the arms.

10 15-15 intervals

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: same work and recovery times. Otherwise: assault bike (air bike) or rowing machine, with the same times.

Key points: Same distance on every rep: pick a finish point.

Easier: 15 seconds fast, 30 seconds of recovery.

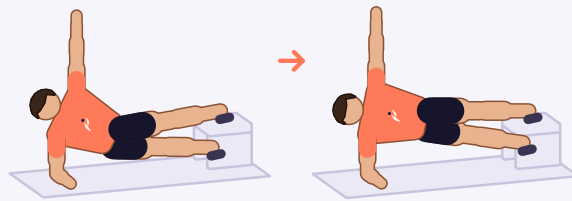

11 Nordic hamstring curl

Kneeling on a mat, feet anchored under a loaded bench, under wall bars or held by another person, lean forward as slowly as possible, body straight. Catch yourself with your hands, then push back up with your hands.

Key points: Hips extended: the body stays straight from the knees to the head.

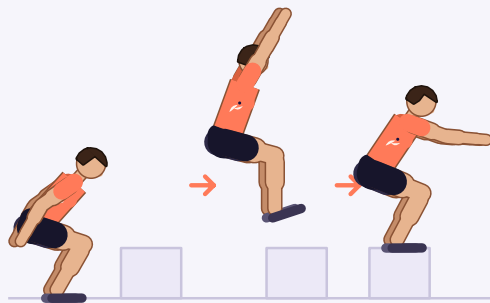

Easier: Shorter descent.

12 Copenhagen plank

On your side, on your forearm (elbow under the shoulder), top leg resting on a bench (at the knee, or at the foot to make it harder). Lift your hips, reach your top arm up to the ceiling and hold the position.

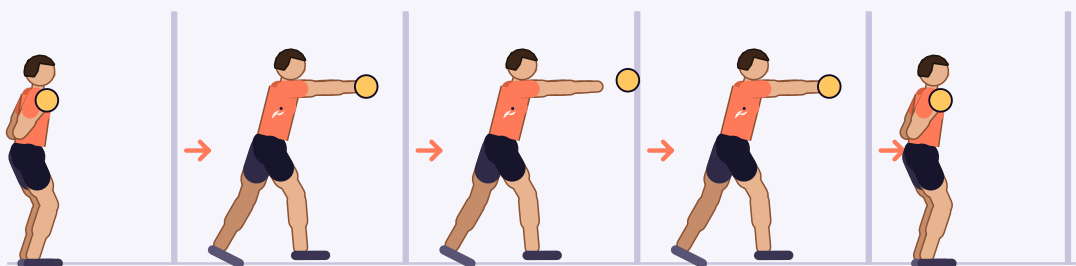

Key points: Body in line: the inside of the top thigh does the work.

13 Box jump

Jump onto a plyo box, land softly, step back down.

Key points: Jump high, not far. Stepping down protects your tendons. In the air, pull your toes up towards your shins (locked ankle), ready for the landing.

14 Two-handed ball throw

Facing a wall, 2 to 4 kg medicine ball at your chest, throw as hard as you can.

Key points: Push with your legs and arms at the same time.

15 Repeated sprints

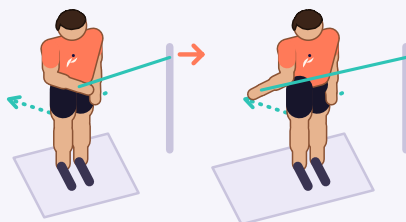

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: 6 sprints of 5 seconds, one start every 20 seconds. Otherwise: 6 sprints of 6 seconds on an assault bike, one start every 20 seconds.

Key points: Every sprint flat out.

16 Easy run

On a **curved treadmill** (non-motorised, curved: you drive the belt yourself), if your gym has one: continuous running at a pace where you can talk. Otherwise: motorised treadmill, bike or cross-trainer, at the same intensity and for the same time.

Key points: If you cannot talk, slow down or alternate running and walking.

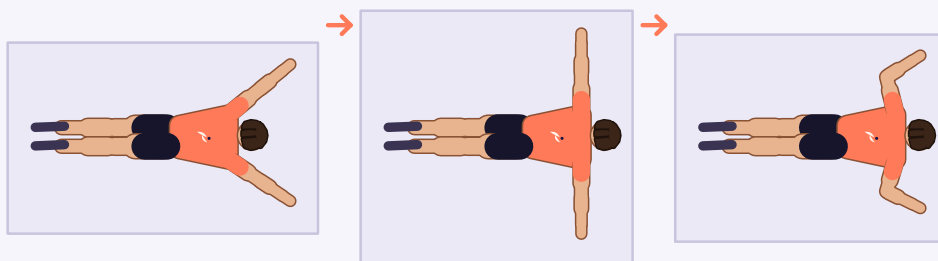

17 Shoulder external rotation

On a cable set at elbow height (or with a band): elbow tucked in and bent at 90°, move your forearm outwards, then come back slowly.

Key points: The elbow does not move, 2 seconds on the way back.

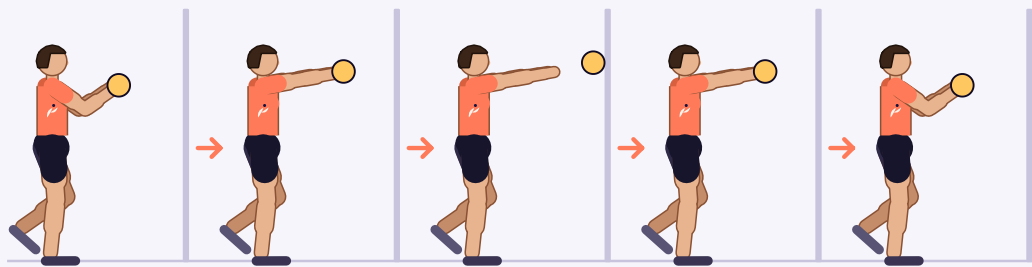

Easier: Without a band.

18 Y-T-W

Lying face down, forehead on a towel. Lift your arms off the floor to draw three letters with your body: Y (arms straight, diagonally above your head), T (arms out to the sides), then W (elbows bent, pulled in close to your ribs). Hold each letter for 2 seconds, squeezing your shoulder blades.

Key points: Thumbs towards the ceiling, no arching.

19

Balance with a ball

On one leg, throw a ball against a wall and catch it. Harder: standing on a bosu or a wobble board.

Key points: The standing knee stays in line.
